Condition	Explanation
C_1	User is already referred
C_2	Referrer has earned more than \$50
C_3	Referred user places an order within 10 days
C_4	Referrer has referred 4+ additional users and all place an order within 10 days

Effect	Explanation
E_1	Award referrer nothing

4 Scenarios

4.1 Scenario 1

Suppose:

- User is already referred
- Referrer has not earned at least \$50
- Referred user places an order within 10 days
- Referrer has not referred 4+ additional users

Using the decision table, this scenario falls under rule 1. C_1 is true, and the remaining conditions do not have an impact on the final effect: E_1 .

4.2 Scenario 2

Suppose:

- User is not already referred
- Referrer has earned at least \$50
- Referred user places an order within 10 days
- Referrer has not referred 4+ additional users

Using the decision table, this scenario falls under rule 2. C_1 is false, C_2 is true, and the remaining conditions do not have an impact on the final effect: E_1 .

4.3 Scenario 3

Suppose:

- User is not already referred
- Referrer has not earned at least \$50
- Referred user does not place an order within 10 days
- Referrer has not referred 4+ additional users

Using the decision table, this scenario falls under rule 5. C_1 , C_2 , and C_3 are false, and the remaining condition does not have an impact on the final effect: E_2 .
